

## Summary

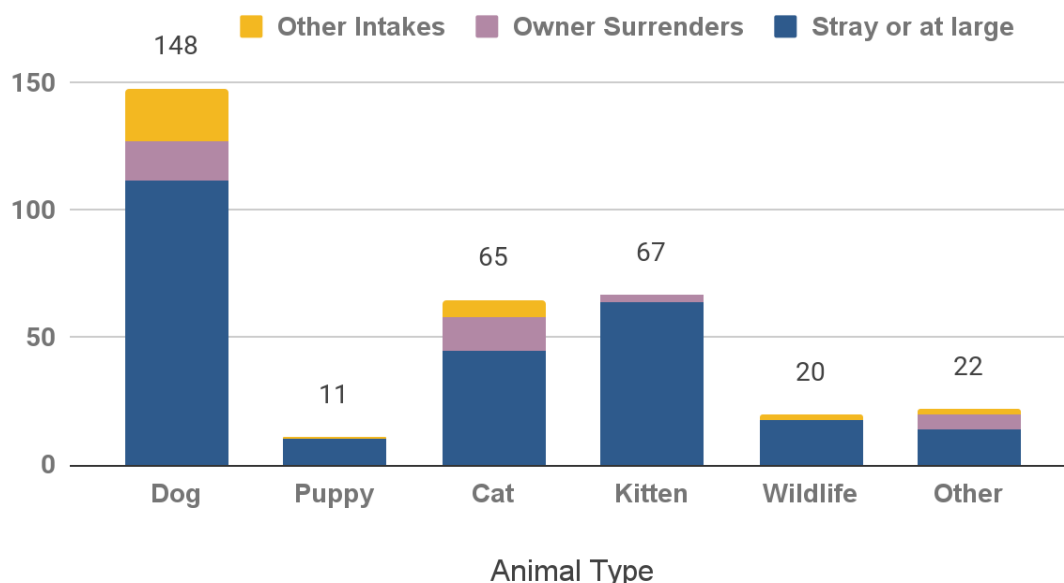

During June 2021, all but essential services offered to the public remained suspended due to the COVID-19 pandemic. Modifications are reflected in reporting metrics including adoption outcomes, volunteer hours, total spay & neuter surgeries performed, and licensing.

## Animal Intake

MCAS continued to accept stray pets from members of the public, and officers also picked up stray or lost animals. Owner surrendered animals were accepted on a case by case basis, depending on urgent circumstances. Other intakes most commonly represent animals placed into protective custody by Animal Services officers.

## Veterinary Care Provided

Animal Health and Animal Care staff provided a wide range of veterinary services to animals in care.

To keep animals healthy, Animal Health staff, and partner veterinarians in the community administered 896 vaccinations, including rabies, [DA2PP](#) and Bordetella for dogs and puppies, and [FVRCP](#) for cats and kittens.

They provided 1,057 health exams and consultations, including routine exams, wound checks, pre-surgery checkups, behavior assessments, and reviewing test results or diagnoses with foster volunteers.

## Fostered Animals

In June 2021, sixty-eight (68) animals entered foster care, joining the existing one-hundred-and-sixty-seven (167) animals already in care at the beginning of the month. The majority of animals in foster care were kittens and adult cats. MCAS foster volunteers cared for a total of two-hundred-and-thirty-five (235) foster animals. Many of these animals left foster care for other outcomes over the course of the month, so the total number does not represent the maximum number of animals in care at one time.

## Animal Outcomes

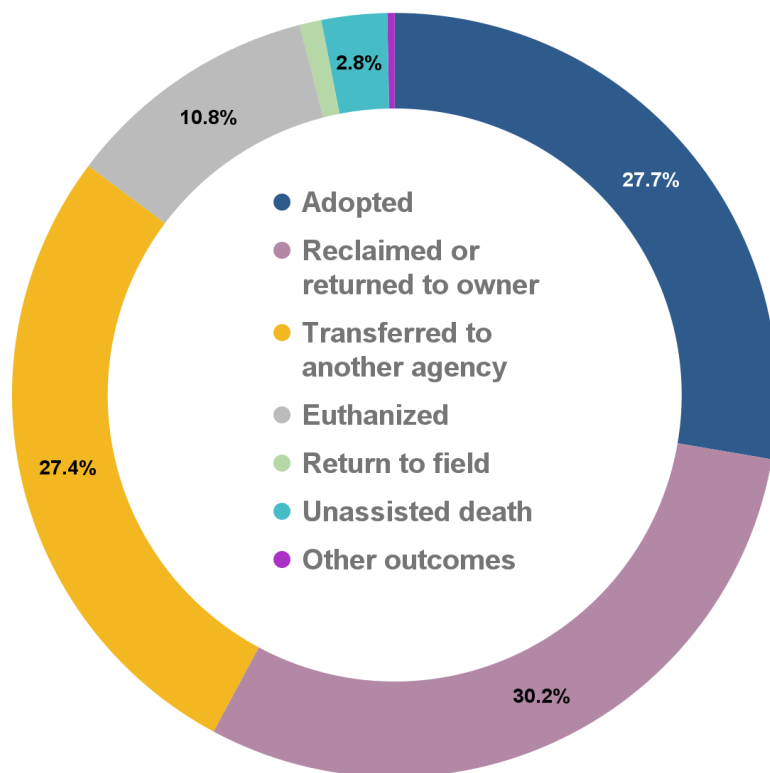

In June 2021, ninety animals (27.7%) were adopted. At the end of September 2020, MCAS launched a virtual adoptions process allowing for online animal selection, application submissions, and remote adoption interviews. A low-contact process was also developed for animal pickup. Adoptions were also performed from community adoption partners, and foster homes.

Ninety animals (30.2%) were reclaimed by their owners. The majority of animals represented in these outcomes were dogs.

Eighty-nine animals (27.4%) were transferred to another agency, including Oregon Humane Society, and Cat Adoption Team.

Thirty-five animals (10.8%) were humanely euthanized, including cases of injured wildlife, injured or severely sick cats, and other domestic animals at the recommendation of a veterinarian, or for behavioral issues which would make an animal unsafe to place back into the community. Since the beginning of the COVID-19 pandemic in March 2020, [cat intake is officially limited to cases where the cat is sick or injured, or in immediate danger due to cruelty, neglect, and similar circumstances](#). There is decreased intake volume for cats, and an increased percentage of veterinary-recommended euthanasia for adult cats due to these intake conditions.

One cat, one coyote, and one mule-deer (0.9%) were returned to the field in June. Nine animals- including one dog, five puppies, two kittens, and one pigeon (2.8%)- had an unassisted death while in care. One snake (0.3%) was lost in care.
